紅圓點: 車頭範圍/Front Nose

Min30

The diagram illustrates a measuring jig and its application. The jig, shown on the left, is a grey L-shaped tool with dimensions: a vertical section of 25 units, a horizontal section of 30 units, a 10-unit wide notch, and a 20-unit wide base. A red arrow indicates the measurement direction. The right side shows a blue car model with a large black wheel. Red dots mark the front nose area. A light blue arrow points to the car's front, and a green arrow points to the wheel. A white triangle is drawn on the car's body, and a green arrow points to it. The text '紅圓點: 車頭範圍/Front Nose' (Red dots: Front Nose area) is present. The dimension 'Min30' is indicated for the car's front section.
